

Fulton County

Department of Solid Waste

The reduction in the county tipping fee for these two categories is intended to encourage re-use. The Solid Waste Department offers a variety of services, including:

- ◆ Landfill with decades of site life remaining;
- ◆ Curbside Recycling for 85% of residents and drop off recycling for the remaining 15%;
- ◆ Business Recycling Program;
- ◆ Public Event Recycling Program;
- ◆ Household Hazardous Waste Day;
- ◆ Latex Paint Exchange;
- ◆ Recycling of vehicle batteries, waste motor oil, tires, bulk metal and textiles;
- ◆ Electronics & TV, fluorescent bulb, rechargeable battery and mercury-containing thermostat drop-off;
- ◆ Eight Transfer Stations;
- ◆ County Demolition Team;
- ◆ Municipal Clean-Up Programs.

Rates

In-County NO COST
Out-of-County \$25/ton

Rates

In-County NO COST
Out-of-County \$25/ton

These special non-residential disposal categories for construction and demolition debris, as well as clean wood products, were established by the Fulton County Dept. of Solid Waste in 2010. It provides an alternate disposal to landfilling - and these categories qualify for LEED certification for recycling.

CATEGORIES CANNOT BE MIXED

Clean Fill will be crushed and used as road base.

Clean Wood Products will be processed and ground in the department's tub grinder. The finished material will be used as mulch.

Call 518-736-5501 for details

Leadership in Energy and Environmental Design (LEED) is an internationally recognized green building certification system, providing third-party verification that a building or community was designed and built using strategies aimed at improving performance across all the metrics that matter most: energy savings, water efficiency, CO2 emissions reduction, improved indoor environmental quality, and stewardship of resources and sensitivity to their impacts.

Developed by the U.S. Green Building Council (USGBC), LEED provides building owners and operators a concise framework for identifying and implementing practical and measurable green building design, construction, operations and maintenance solutions.

LEED is flexible enough to apply to all building types – commercial as well as residential. It works throughout the building lifecycle – design and construction, operations and maintenance, tenant fitout, and significant retrofit. And LEED for Neighborhood Development extends the benefits of LEED beyond the building footprint into the neighborhood it serves.
